

AT34: Audio Counter Tray

Originally developed for a leading international financial company, the AT34 provides quick and easy transfer of cash and paper work - there is no plastic slide to move back and forth. The permanent gap is set down in the unit.

The design incorporates metal plates which clamp the glass into position by bolting through the steel bar traversing the top of the unit. Set below the steel bar is a solid piece of polycarbonate, which assists staff to see into the pass through tray.

The AT34 uses the latest electronic speech equipment, with the speakers and microphones set below splayed sides - thus reducing the problems caused by items being placed on the speech pods. On split level counters we recommend a small gooseneck microphone to be fitted on the secure side.

Summary

- 50mm clear height for fast transactions
- Electronic voice enhancement
- Bullet resistant to G2/S86

Product Specification

Dimensions (mm)

Overall: 175(h) x 540(w) x 470(h)
Central channel width: 50
Weight: 37kg

Construction

Powder coated mild steel body and tray with polycarbonate cross rail insert

Finish

CR4 M/steel epoxy powder coated BS0A05.
Leatherette finish (Goose Wing Grey) as standard.
28mm thick clear polycarbonate rail.

Audio

Modular audio component built into tray inserts with external audio module
