

## PT7097: Front & Opening Pass Through Tray

The PT7097 has been designed for high security areas especially where there is a need to breach a fire wall.

In standard form, the pass through offers 2hr fire rating (to DIN 4102) and G2/S86 ballistic resistance. Non fire-rated versions of the pass through can be built to offer ballistic resistance up to R2. For added security, the design of the unit allows it to be installed into a wall up to 250 mm thick.

The unit is convenient to operate using a lever which extends the money carriage and locks it in both positions. The internal sliding cover can only be opened after the carriage has been extended. Despite the heavy build quality, the unit is easy to operate.

The money carriage is 230 x 330 x 28 mm deep (DIN C4 size) allowing the passing of A4 documents in envelopes. Maximum extension of the money carriage is 250mm.

The unit can be fitted with an electronic speech enhancement system.

### Summary

- 2 hr fire resistance
- Bullet resistant to G2/S86
- Draught-free pass-through
- Optional electronic speech enhancement
- Manually operated
- Internal or external use

### Product Specification

#### Dimensions (mm)

Overall	165(h) x 630(w) x 630(d)
Pass-through	230(h) x 28(w)
Fascia	630(h) x 165(w)
Weight	91kg

#### Construction

Body: mild steel; fascia & top plate: aluminium

#### Finish

Can be painted a range of RAL colours. Front cover can be made of stainless steel. The fascia and top plate can be anodised to different finishes.
