

## TD42: Point of Sale Cash Deposit

---

For many years banks and building societies have used our Point of Sale Cash Deposit box as a cost effective deterrent to violent crime against retail outlets.

This unit can be mounted at the counter or check out positions allowing the cashier to conveniently deposit excess cash, coins or accrued takings into a controlled access strong box. The content of this "strong box" can then be retrieved at close of business, or if necessary during transactions subject to a pre-set time delay (30 mins delay).

By using this system available cash at the point of sale is reduced dramatically and thus the incentive to raid the cash drawer is similarly reduced.

### Summary

- ° Flexible, strong box with time lock
- ° Perfect solution for securing takings at retail outlets

### Product Specification

#### Dimensions (mm)

300(d) x 200(w) x 600(h) - adjustable plinth units available to increase height. Weight 20kg

#### Construction and Finish

Powder coated mild steel (BS00A05)

#### Time Lock

Mechanical preset delay with climbing LED display and door open alarm. Lock delay period adjustable from 2.5 mins to 6 mins.

#### Fixing

Bolt fixing into floor, under side of counter or other suitable structure.

#### Resistance

Resistant to physical attack
