

## UT-75 Universal Audio Tray

The Universal Audio Tray range allows easy transfer of cash and documents where glass security screens are used, whilst providing high quality electronic voice communication.

The UT-75 version is equipped with a deep stainless steel pass through scoop which allows transfer of bulkier items, and is protected by a moveable plastic slide, this tray is also available with an ABS Centre scoop section.

The surface mounted speaker and microphone modules ensure that sound pick-up and projection are extremely effective thus producing excellent voice reproduction. An optional gooseneck microphone for staff use can be provided when adverse ambient noise conditions are encountered.

Since the speaker and microphone modules are adjustable, the UT-75 may be used with any screen whose thickness ranges between 32-62mm.

By adding the SB Shot Box, the UT-75 Tray (ABS version) may be converted to a fully ballistic unit to G2 specification.

### Product Specification

#### Dimension (mm)

Depth(with Audio Modules)	100
Depth (Tray only)	75
Height	480
Width	450
Weight	8.5kg

#### Electrical

Speaker impedance (audio)	4 or 8 ohms
Microphone	2-wire electret, cardioid

#### Connections

Tray to remote Amplifier	'D-type' connector (Tray) 2m multicore lead
--------------------------	---

#### Controls

Speaker output	Rotary volume control
----------------	-----------------------
