

VP44: Vision Panel

The vision panel provides the means of vision, safe from ballistic or physical attack, into or out from a secure area. Available in two forms - with or without two-way electronic speech transmission - it can be fitted to internal or external walls or security doors and is ideal for use with a bulk transfer unit.

The VP44's steel glazing frame and bullet-resistant anti-spall glass provides protection to G2/S86 level. The vision panel also provides protection against physical attack.

A lift-up flap on the secure side ensures privacy when the vision panel is not in use. The external flange is designed to transmit the energy of a physical attack onto the wall surface whilst also acting as an architrave.

Summary

- ° Secure vision through walls and doors
- ° Bullet resistant to G2/S86
- ° Optional electronic voice enhancement
- ° Extensively tried and tested

Product Specification

Dimensions (mm)

Overall: 204(h) x 540(w) x 74(d)
Glazed area: 105(h) x 442(w)
Aperture: 160(h) x 490(w)
Weight: 10kg

Construction

3mm thick mild steel; glazing: 42mm anti-spall bullet resistant glass

Finish

Charcoal grey hammer polyster powder coat to 8-4734816
